YouTargetr Exclusive Bonuses

(1) Social Media Viral Content Builder for Wordpress

Get ready to rocket your content into the viral stratosphere. This automated plugin developed for Wordpress can hide any content so that in order to read it the user must share it via social media channels. This has the potential to bring much more traffic to your content and turn it viral.

Features;
- Lock down images, entire posts, download links or any piece of content so visitors need to share your content in order to access the locked content.
- Our Content Autoposter takes your newly published content and posts it to social channels
- Our Viral Content Builder plugin for turning your content into viral building powerhouses by blocking certain pieces of your content so that visitors must share it to gain access to important images, text, charts, videos, etc.
- And our Twitter Manager to automate the process of getting you followers using targeted Hashtags, Keywords or even sniping followers from your competitors.

With our Viral growth hacking plugin your posts can be shared 1000, 5000, 50,000 times and that is a fact. Many of our clients started with standard social sharing buttons and were getting 5, 10, 100 shares. That is not bad for a start but with this simple Viral growth hack you can explode your readers and make your posts go viral. The old standard social share buttons have no call to action, they do not compel readers to share so they don't do squat. Period! We all know this. We hope that our wonderfully written smart, funny, whimsical post will be different but just tacking on social share buttons at the top/bottom/side does not cut it. Unless you are some monster website like mashable or cnn who get hundreds of thousands or millions of visitors your social buttons are going to languish. until now. In about 20 minutes you can be using our Viral Content Builder.

(2) Facebook Reviewer

This Facebook Reviewer Application is designed for brands or all those who want to get more reviews on branded products or deals or promotions on their pages and get users engagement. Give more than one products to get reviews and ratings from fans in exchange for their email and other contact info. This is a very user friendly application through which you can rate and review the post or products. The specialty of this app is the customize-able interface to make it your brand identity. Once your fan write a review for your product , it will be posted in his/her wall and thus spreads to his/her friends through this wall post; which will in return make the friend to view your page and comment.You can even customize the header image , content and also the headings which will be posted in your fans wall. Promote awareness of your brand, increase fan appreciation and collect contact information as they claim.

Checkout all the mindblowing features engineered into Facebook Reviewer
